## 7 Layer attains Microsoft Gold Certified Partner status

Date: Dec 2009

**7 Layer** are delighted to advise that we have been successful in attaining Microsoft Gold Certified Partner status with competencies in both Mobility Solutions and Custom Development Solutions. The prestigious certification recognises **7 Layer's** high level of expertise with Microsoft technologies and proven ability to meet customers' needs.

Microsoft Gold Certified Partners undergo a rigorous assessment and analysis by Microsoft to ensure they are delivering technologies and services that meet Microsoft's stringent benchmarks. The certification offers organisations the means to identify those companies that are committed to the highest industry standards set by Microsoft in designing, developing building and maintaining end-user solutions.

Achieving the status required **7 Layer** possess a combination of employee technical Microsoft certifications, multiple customer references and certification in one or more competencies. Microsoft competencies are designed to help differentiate a partner's capabilities with specific Microsoft technologies to customers looking for a particular type of solution. Each competency has a unique set of requirements and benefits, formulated to accurately represent the specific skills and services that partners bring to the technology industry.

"We are extremely pleased to have attained Gold Certified status in the Microsoft Partner Program. This allows us to clearly promote our expertise and relationship with Microsoft to our customers," says Lee Maisner, Managing Director. "The benefits provided through our Gold Certified status will allow us to continue to enhance the offerings that we provide for customers."

The Microsoft Partner Programme was launched in December 2003 and represents Microsoft's ongoing commitment to the success of partners worldwide. The program offers a single, integrated partnering framework that recognizes partner expertise, rewards the total impact that partners have in the technology marketplace and delivers more value to help partners' businesses be successful.

### About 7 Layer Solutions

**7 Layer Solutions** is a specialist software house focussed on the development and delivery of robust and innovative solutions to the cash logistics industry.

The company has undertaken contracts for banks, security companies, suppliers of cash processing systems and commercial companies, including some of the industry's best known names. We are used to working on commercially sensitive business projects where maintenance of security and confidentiality are essential.

Press Release... Press Release... Press Release... Press Release... Press Release...

We act as a developer of products for other companies, working closely with the in-house client facing teams to design, develop, deliver and support the software solutions needed by end client organisations such as retailers, commercial banks, cash centres and central banks. We also develop our own range of niche products that we distribute through specialist suppliers of services to the cash logistics industry. The skill set and experience of its staff are such that **7 Layer Solutions** are able to assume responsibility for existing applications, for stabilisation and maintenance, or build new solutions straight from the business requirements. **7 Layer** is able to engage in a software project at any stage from initial concept definition through to deployment.
